---

Thanks for the invite Stephanie. As long as nothing comes up I am willing to participate. What do I need to do between now and April 20<sup>th</sup>?

FYI attached is a presentation I made to your undergrads several years back.

**Subject:** UC Biology Professional Development

Dear Dr. Lazorchak:

I am a faculty member in the Department of Biological Sciences at the University of Cincinnati. I am writing because I am teaching a course on Professional Development for graduate students this semester. As part of that course I would like to bring together a panel of individuals that can talk with the students about different careers in science. The objective is to provide the students with a better understanding of different careers through a discussion of topics including, what a typical day looks like, job responsibilities, qualifications, and expectations, and challenges in pursuing a given career.

I think the students would greatly benefit from your perspective and if you would have time I would love to have you as part of the panel. The course meets on Mondays from 2:30-3:25pm and the panel would meet on April 20th.

Sincerely,

Stephanie Rollmann
